GISCafe - Innovation Through Collaboration

October 29, 2007
From: [GISCafe](#)

Notes from the GEOINT 2007 Symposium

October 22 - 26, 2007 by **Susan Smith**
A summary of recently published GIS product and company news, featured downloads, customer wins, and coming events. Brought to you by GISCafe.

Each GISWeekly Review delivers to its readers news concerning the latest developments in the GIS industry, along with a selection of other articles that we feel you might find interesting. If we missed a story that you feel deserved to be included, please contact us! Questions? Feedback? Click [here](#). Thank-you!

GeoEye, Inc., a leading producer of satellite, aerial and geospatial information, announced that CEO Matthew O'Connell received the prestigious Intelligence Achievement Award for Industry from the United States Geospatial Foundation (USGIF).

New Products

Pictometry International Corp. announced today that it is launching the Pictometry Military Planner™ at the GEOINT 2007 Symposium.

The Pictometry Military Planner is the most advanced of a range of Pictometry 3D modeling analysis tools specially designed for military use. It rapidly creates 3D fly-through models from 2D data and uses Pictometry's oblique images to automatically apply photo-realistic textures to the model, further enhancing the realism of the virtual scene.

Cutting Edge Networked Storage debuted their new Modular Storage Solutions (MSS) and Integrated Storage Solutions (ISS) for the GIS community at the US Geospatial Intelligence Symposium (GEOINT 2007).

Cutting Edge demonstrated their flagship MSS and ISS offerings configured for GIS and defense applications. The MSS and ISS series of storage solutions are powered by Cutting Edge's 3rd generation field proven EdgeWare(TM), a fully integrated 64-bit storage operating system that provides a storage centric, easy-to-use and easy-to-support, heterogeneous network file system.

The **Engineer Research and Development Center's Topographic Engineering Center (ERDC-TEC)** held demonstrations of its Joint Geospatial Enterprise System, ENFIRE, Battlespace Terrain Reasoning and Awareness system, GeoPDF mapping format, and award-winning BuckEye

system during USGIF's GEOINT 2007 symposium.

BuckEye uses a digital camera and Light Detection and Ranging (LiDAR) elevation data to produce geospatial information for intelligence, surveillance and reconnaissance (ISR), high-resolution 3D urban mapping, as well as change detection/battle damage assessment missions in support of the Global War on Terror.

Maponics, LLC pre-announced today the upcoming release of Maponics Postal Boundaries™ GIS data, including ZIP Code polygons and carrier route polygons. These boundary files are critical for any organization conducting direct marketing or trying to display accurate postal boundaries via web-based applications.

Leica Geosystems Geospatial Imaging announces the development of a new Tactical Airborne Mapping Surveillance (TAMS) system. TAMS is platform agnostic, with a multi-sensor payload capable of in-theater fixed wing, helicopter and Unmanned Aerial Vehicles and Unmanned Aerial Systems (UAV/UAS) deployment.

Upcoming Events

[2007 IMTA Asia Pacific Annual Conference & Trade Show](#)

Date: November 2 - 3, 2007

Place: Gold Coast International Hotel
Surfers Paradise, Queensland, Australia

[Trimble Dimensions 2007](#)

Date: November 5 - 7, 2007

Place: The Mirage
3400 S. Las Vegas Blvd. , Las Vegas, NV 89109 USA

Surveying, Engineering, Construction, and Mapping professionals: process integration, new positioning solutions and advanced communications technologies are changing the competitive landscape.

Process integration, positioning and communication technologies will profoundly impact surveying, engineering, construction and mapping professionals. It's ideally suited for: Aerial Photography and Photogrammetric Mapping Services, Earthmoving Contractors, Foremen, Supervisor, Grade Checker and Site Engineer.

[2007 ESRI Homeland Security GIS Summit](#)

Date: November 5 - 7, 2007

Place: Adam's Mark Hotel
Denver, CO USA

Be a part of the 2007 Homeland Security GIS Summit to learn and share how GIS can be applied for critical infrastructure protection planning—a data fusion and analysis solution and for prevention/protection and response/recovery measures within an emergency operations center. The ESRI Homeland Security GIS Summit provides a forum for you as professionals in local, regional, state, and federal government; utilities; and the private sector who establish priorities and set directions for your organization, and work to improve systems for public protection and business continuity.

[GreenBuild 2007](#)

Date: November 7 - 9, 2007

Place: Chicago, IL USA

If designing, building, living, and working in green buildings is important to you, you're in good company. Come join 18,000 other people who agree that green building is a good idea and good for business at the Greenbuild International Conference and Expo. Greenbuild 2007 will take place in Chicago at the new McCormick Place West Building.

[7TH GEOSPATIAL INFORMATION FORUM](#)

Date: November 8, 2007

We're taking
GeoPDF
on the road.

Come see how you
can roll geospatial
data out to anyone.
